# Programming Assignment: Todo List

You have not submitted. You must earn 8/10 points to pass.

**Deadline**

Pass this assignment by Feb 7, 1:59 AM CST

Instructions          My submissions          Discussions

## Todo List

In this assignment we will build a simple todo list application. We have created a web based front end, and parts of the back end for the application. You will be responsible for completing the back end to finish the project.

### Open the Project

Download the handout archive, extract it somewhere on your filesystem, and open the directory **todo** in your code editor.

### Running the Project

Run sbt within the **todo** directory. From the sbt prompt run the **run** command. This will start a web server. In a web browser go to http://localhost:3000/
and you should see the todo list application's interface.
